What's New in 3.0

Welcome, and thanks for downloading GoMLS 3.0.

GoMLS introduces a fresh, new look with improved User workflow in this latest release of version 3.0.

The following items have been added, or modified, since GoMLS version 2.8.

NOTE: To view your current version number, tap, "About" in the GoMLS main menu.

Enhanced UI

Users will first notice a significant upgrade to the GoMLS interface. Wrapped in a brighter, more user-friendly environment, commonly used features—such as searches and results—are now even easier to navigate.

Menu

The GoMLS menu is now accessed by tapping the MLS branding placeholder located to the left of the Search Box in the app header.

Though the basic vertical layout has remained the same, the following menu options have changed.

Search Properties

Formerly known as, "New Search", this feature has been renamed to, "Search Properties" and includes updates to the following features.

Мар

- Search Textbox In addition to searching MLS#'s, Addresses and Places, the Search Textbox now allows Users to search for properties near a specific Point-of-Interest.
- **Nearby** formerly known as the, "Near Me" option located on the main menu, this feature has been renamed to, "Nearby" and is now accessed as a button on the map.
- Map Markers Plus tapping a map marker now expands the marker to show if property is currently marked as a favorite.
- Draw the icon used to identify this tool has been updated.
- **Filters** the icon used to access the, "Search Filters" is now a button labelled, "Filters" and is located below the Search Textbox.
- **Sort by** the icon used to sort properties is now a button and labelled according to the current sort order and is located below the Search Textbox.
- Save Search the icon used to save a search is now a button labelled, "Save Search" and is located below the Search Textbox.

Results

- **Results Panel** an interactive Results Panel is now anchored at the base of the map—giving Users the ability to quickly toggle between map and list/gallery views with a simple swipe of the finger.
- Filters the icon used to access the, "Search Filters" is now a button labelled, "Filters" and is located below the Search Textbox.
- Sort by the icon used to sort properties is now a button and labelled according to the current sort order and is located below the Search Textbox.
- Save Search the icon used to save a search is now a button labelled, "Save Search" and is located below the Search Textbox.

Contacts

Formerly known as, "My Contacts", agents will find that, in addition to their contacts, this section now includes an Agent Directory.

My Favorites

Formerly known as just, "Favorites", the, "My Favorites" name update more clearly indicates that this section contains properties favorited by the user.

Chat

Formerly known as, "Home Assist", GoMLS's primary communication tool has been rebranded simply as, "Chat". Though the name has changed, there has been no additional updates to the feature at this time.

Calculator

Simple and advanced calculators are now available for prospective property owners to determine their monthly payments, and affordability, based on a variety of user-added data.

User Guide

Formerly known as, "Help", this section has simply been renamed to, "User Guide".
